

AC-4250 Cashdrawer

- 5 horizontal bank note trays with standard width
- Optional coin counter tray
- Robust housing
- Elegant front

The ARTDEV AC-4250 is a cash drawer with a standard width of approx. 42 cm in a metal housing with space for eight coin cups and five euro bill trays.

The AC-4250 is opened in a commercially available electronic way through the cash register via the receipt printer. For this purpose, the AC-4250 has the well-known connection cable with RJ12 connector, which is connected directly to the receipt printer. Contrary to the well-known cash drawers of the same width, the AC-4250 has enough space inside to hold the range of euro banknotes including the 100 euro note with hold-down bars. Underneath is the coin insert with eight coin containers, as well as a check slot for slipping receipts, receipts or other evidence into the cash drawer under the cash insert without removing it from the cash drawer.

The coin insert can be removed separately from the money insert and exchanged for an optional coin counting board. The drawer is pulled out in the usual way using plastic rollers.

A 3-position lock and a metal housing with a visually appealing plastic front against the highest level of security.

Technische Details:

- Dimensions (W x D x H): 425 x 455 x 100mm
