

LCD730 - Customerdisplay

- LCD customer display
- Universal use
- USB/RS232 connection
- Extremely compact dimensions
- Large, easy-to-read characters

ARTDEV
DEVELOPED FOR YOU

ARTDEV's LCD730 customer displays offer an innovative solution for retail and similar applications. These modern displays are characterized by their outstanding image quality, impressive versatility, and robust construction, meeting even the highest demands in demanding environments.

The LCD730 features a display that clearly displays customer-relevant data, is easy to read, and energy-efficient. The display's screen diagonal is ideally suited to a compact size and optimal readability. It offers ample space for an attractive presentation of prices, advertising messages, or other important information. The high resolution and high-contrast color display make content easy to read even from a wider viewing angle.

The LCD730 display is designed for seamless integration into existing POS systems. Installation and configuration are straightforward thanks to standardized interfaces and intuitive operation. It is an ideal choice for retail, banks, pharmacies, and other service providers that value customer-focused communication.

Another feature of the LCD730 is its durability. The display is not only energy-efficient but also constructed of high-quality materials that can withstand even intensive use.
