

# LCD750 - Customerdisplay

- LCD customer display
- Universal use
- USB/RS232 connection
- Very secure, space-saving stand
- Large, easy-to-read characters

**ARTDEV**  
DEVELOPED FOR YOU

ARTDEV's LCD750 displays were specifically designed for retail and other customer touchpoints to optimize customer communication while increasing efficiency.

The LCD750 features modern technology and user-friendly operation. The generous display offers excellent visibility and ensures information is presented clearly and attractively. The screen's clarity ensures content is easily visible even from a distance, making it an ideal tool for displaying prices, promotions, and other customer-relevant information.

A key advantage of the LCD750 is its excellent compatibility with existing POS systems and technical infrastructures. Thanks to its flexible connectivity options, the display can be easily integrated into virtually any environment. This saves time and simplifies commissioning, making it an attractive option for companies seeking an efficient solution.

The LCD750's construction also impresses with its durability and reliability. The housing is designed to withstand the demands of busy environments, while its energy-efficient operation contributes to sustainable use.
